Re: **Permit Review of Drum Mine's Mizpah Pit Development and New Heap Leach Pad Facility (Operator's March 25, 1992 Response), M/027/007, Millard County, Utah**

The following comments address my review of the (name of mine operation) plan. My review addresses specific plan deficiencies by section of the Minerals Rules, in chronological order, as indicated below:

I reviewed the sections in the operator's March 25, 1992 response, which addressed the questions I introduced in our January 14, 1992 review letter (under R613-004-106.8 and R613-004-111.12). I found that the operator answered my questions satisfactorily.
